

Annual Bridge Surveys

Examination of Highway/Foot Bridges & Culverts – Lincolnshire

OFFSHORE & INSHORE DIVING SERVICES TO PUBLIC, PRIVATE, FRAMEWORK AND ENERGY CLIENTS WITHIN THE INSHORE/INLAND, MARINE RENEWABLES AND OIL & GAS SECTOR

Date:
2008 to 2015

Programme Duration:
Annual 30 Days

Project Number:
2400, 512066, 513005

Client:
Lincolnshire County
Council

Principal Contractor:
Red7 Group

Overview:

Red7 was contracted by Lincolnshire County Council to conduct underwater and surface examination of highway/foot bridges and culverts and select environment structures across Lincolnshire County.

Description:

Red7 management have been approached multiple times since year 2008 to conduct bridge/culvert inspections, scour surveys and repair works. The inspection programmes are generally conducted over a two year period. Lincolnshire assets have varied construction including materials such as; iron, steel, concrete, timber, masonry brick and block. In addition to GVI and tactile inspections each structure warranted dimensional and scour surveys. Select assets were also exposed to further NDT such as ultrasonic thickness (UT) measurements.

Diving/survey operations were orchestrated by Red7's in-house qualified diving engineers who also carried out site work with Red7 dive teams and compiled detailed engineering reports.
